

## **MAPPING**

TownSuite Mapping is a revolutionary, easy to use GIS viewer and editor designed specifically for municipalities. Leverage your existing data to deploy GIS powered solutions to the entire organization – not only GIS Staff. No need to implement expensive resources and tools, and no technical GIS know-how is required.

Mapping is parcel-centric, integrating with assessment and land information from your Provincial Government. Mapping enables your municipality to:

- Scan and/or link any file type to a parcel, such as as-built drawing, agreements, photos, movies, etc.
- Link to any municipal data stored within your organization.
- Access GIS capabilities that would otherwise be unavailable across the municipal organization, including Zoom, Pan, Measure Distance, Titles, Annotations, Labels, Attributes (and their definition) and spatial selections.
- Access to powerful 3D GIS capabilities that include Floodplain Simulations, Digital Terrain Model (DTM) presentation, automatic draping of 2D Vector and Image Layers over a DTM, Light and Shadow control, Rendering of 3D Vectors for visual effects.

## Intuitive Interface

Provide non-technical staff access to dynamic maps enabling: Municipal zoning Property boundaries Infrastructure Custom layers of data

## Integrate With Google

Full integration with Google Maps and Google Earth allows the user to take the advanced funtionality of Mapping to Google's robust platform.

## Made To Work Together

TownSuite Municipal Software products are designed to work together as an intelligent ERP solution made just for you.
